

WOLF INDUSTRIES OPTIONS BOOK

REAL PEOPLE BUILDING EXTRAORDINARY HOMES

Being the Leader in Turnkey Solutions Done Right the First Time

EMPOWER.

Yourself.

Wolf Industries was designed with the idea of giving people more options; another way to find freedom and expression through simplicity.

Traditional stick-built homes are oversized and overpriced - while those houses that do feature a small footprint aren't built to last. Our prefab modular homes are affordable, scalable and offer unsurpassed quality. A home is a serious purchase and we know that. From the decision-making process to the final handshake, we work hard to earn and maintain your trust. We won't stop until we've given you every reason to leave a 5-star review.

What is prefab modular and how is it different than a mobile home, manufactured home, or tiny home?

Our version of prefab modular refers to our environmentally controlled factory build. Modular meaning we build all pieces of the home separately and prefab where we put it together prior to it leaving our factory. We deliver a completed home to your property. Wolf Homes follow standard building code, same as outside stick-built homes. The term stick-built refers to on-site building. Since we are built off-site we can't say stick-built from the start, but once your home is on-site, we are a prefab modular home built to stick-built code requirements.

Mobile and manufactured homes are following a lower set of building standards known as HUD, set by the federal government.

Tiny homes are 400 sqft or less, are kept on their trailer so you can pull them around, are not permittable, are required to be moved periodically, and follow RV/mobile home code.

A Wolf Home is designed to be a permanent house on your property, lived in by your family for generations to come!

Wolf FAQs:

Q: Is my property eligible to have a prefab home/ADU added?

A: Great question! To get started, what is the address you are interested in placing a home or ADU on? We'll review the zoning, setbacks and other requirements in your area and get back to you! <https://wolfind.com/quote/>

Q: Do your homes go on a foundation?

A: The majority of our homes are permitted and placed on a concrete stem-wall foundation - this is what makes our product different! We do however, offer the ability to place them on a trailer as a 'pre-fab home on wheels,' unpermitted.

Q: Are there lofts in your units?

A: We do not offer lofts in any of our models.

Q: What size homes do you offer? Can they be customized?

A: Our homes come in 6 floorplans, with sizes ranging from 300 to 1,232 square feet. They can be customized with options including finishes, roof styles, window and door placement, cabinets, appliances and more. Premium options like granite countertops are built in at no extra cost!

Q: Do you offer lending?

A: We don't have in-house financing but we do have a preferred lenders page on our website, or reach out to our sales team for more details.

Q: Are there additional service costs?

A: Yes. For an additional fee we offer Permitting and Delivery/Setup services. We are proud to offer a full turn-key solution to our customers. We can be your general contractor from start to finish!

WHAT IS INCLUDED IN A WOLF HOME?

The base price of our homes include great standard features that make the house move-in ready. Keep the basic offerings, or upgrade to customize your home. Then add on permitting and delivery & setup to create a turn-key stress-free project!

Visit the Process Page on our website to learn more.

SHELL

- Fiber Cement Lap Siding
- 30 yr Composite Shingles
- 6-panel Slab Front Door
- Turn Knob Door Hardware
- Gable or Shed Roof
- Double Pane Vinyl Windows

- PEX Plumbing
- Romex Wiring
- Fiberglass Insulation - R24 in walls, R30 in floors, R50 in ceiling
- Spray foam around all utilities
- Exceeds Energy Code
- Permanent Stemwall Foundation
- Wind Rating @ 145 mph, Category B

SHELL

It's what's on the inside that matters. But at Wolf, we believe the exterior details of your modular home need to be just as perfect. Choose from a variety of siding, windows, and porch options to get it just right for you.

MODEL E

BEACH HOUSE GETAWAY

FEATURED CHOICES

- A Composite Shingle Roofing**
Outer layer made of asphalt, bottom is fiberglass. Standard option
- B Standard Lap Siding**
Board and Batten would be the upgrade option

C Full Light Glass Door
For that little extra detail to make your front door stand out! Upgrade option

D Exterior Soffit Lights
These add a nice ambience to your outside space. Upgrade option

E 3' x 3' deck with stairs
This house added a second entry option.

ROOF STYLE

GABLE ROOF
Standard

TRADITIONAL OR MODERN?

A gable roof or shed roof design can be on any of our models, you just have to decide what style you are going for! There is no cost difference between the two styles, both are standard.

SHED ROOF
Standard

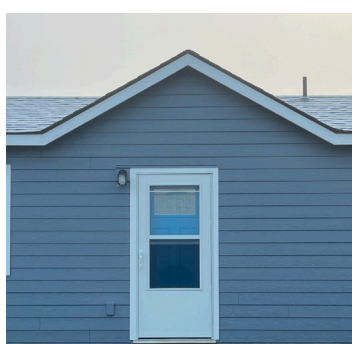

SHED ROOF

This is the more modern design and features upper transom windows for added light. Both gable and shed roof feature 10' peaks. The shed roof can be upgraded to metal as well.

GABLE ACCENT SIDING

CEDAR SHAKE
Standard gable material in B, E, F, K

CLOSET OPTIONS

PANELED BARN DOOR
Upgrade

Works great to cover the washer and dryer in
some models.
Style will match your other interior doors.

Our closets have a shelf and rod for hanging clothes and storage. In most models, the washer/dryer and water heater occupy closet space. Want those utilities in their own closet?! A common change is removing the 2nd bedroom in the model E to create a larger living room/kitchen area and moving those utilities to a utility closet, as shown above. We could also make the washer/dryer side-by-side in that modified floor plan instead of stacked. So many options!

CEILING & VENTING

STANDARD OPTION

All of our homes have a ceiling fan in the living room/kitchen area to help circulate air flow from your mini-split. You can add additional ceiling fans to any other room.

CEILING FINISH - SHEETROCK

Standard Option in all models except Upgrade for model B

CEILING FINISH - PINE TONGUE & GROOVE

Upgrade for all other models Standard Ceiling Finish in B

RIDGE BEAM - MODELS I & J

Our standard finish for the center beam is wrapped in wood, either fir or pine, This offers a nice accent piece and conversation starter. Covering it with drywall would be the upgrade.

FIR WRAPPED - STAIN
Standard

PINE WRAPPED
Upgrade
*Upgrade Pine T&G Ceiling

KITCHEN

Kitchens have always been the focal point of every home, and in tiny homes especially, they take up a lot of space. This is where you can make a statement with appliances and cabinets.

MODEL J

A Granite/Quartz Countertops
High quality Granite or Quartz countertops are standard on all of our models.

B Cabinets with Crown Molding
Premium quality Gray Shaker style cabinets with soft-close feature.

C Undermount Single-Bowl Sink
Sleek design that doesn't leave water all over the counter.

D Under Cabinet Lights
Adds a nice detail accent for a soft glow.

KITCHEN ISLANDS

We have several different options for kitchen islands, depending on the model. Islands are designed to maximize functionality—providing extra cabinet storage, generous countertop space, and convenient seating. In some layouts, the island can even replace a traditional dining table, creating more room for other furniture and enhancing the flow of your living space. All islands are an upgrade except in the model I where it comes standard.

-------	---------	------------	----------	------------	------

EXTREME COLD WEATHER PACKAGE

Our homes follow IRC/IBC standards, but sometimes we place a home in an extreme weather area which requires additional protection against the elements. Our extreme cold weather package increases our standard HVAC to a cold climate heat pump with a rating of up to -15°, adds a base pan heater to the condensor unit on the outside of your home, increases the foam insulation in your ceiling from 3" to 4" depth, and adds an additional electric resistance wall heater by the front door.

If you upgrade to a metal roof, we also add vent guards

COASTAL PACKAGE

Coastal environments may require additional protection against corrosion, moisture, and salt exposure. Our coastal package includes stainless steel flashing above window trim, door trim, and ledger boards in place of our standard painted steel flashing. It also includes wood rake trim in place of T-metal flashing at gables, hot-dipped galvanized nails for siding and roofing in place of standard nails, an interior electrical panel in place of the standard exterior panel, plastic roof vents in place of metal, and plastic flashings for roof penetrations in place of metal.

Additional considerations: Metal roofing is not recommended within approximately 2,000 feet of the ocean.
